polyWatch®

GLASS POLISH

Everyone who owns watches knows the problem: almost every surface made of glass is scratched sooner or later. As a result, ugly scratches significantly reduce the value of the scratched articles. With the glass scratch remover from polyWatch scratches can be easily and reliably removed from all watch glasses.

DIAMOND-POLISHING-TECHNOLOGY

- Removes fine, light and medium deep scratches from glass
- Two-component system:
  Step 1: Diamond-Polish
  Step 2: Diamond-Finish
- Suitable for all glass qualities

MADE IN GERMANY

Content: 1 syringe REPAIR NO. 1 (0.5 g), 1 syringe FINISH NO. 2 (0.5 g),
1 polishing rod, 1 rubber cap, 2 x 6 microfiber-polishing strips, 1 microfibre cloth

polyWatch®

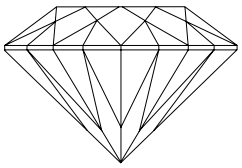

GLASS POLISH

polyWatch High-Performance-Diamond Polish for Glass:

The glass scratch remover from polyWatch pertains to a two-component system, in which scratches can be removed from glass in two successive steps.

Thus, the optics, the function and, last but not least, the value of the watches are restored. This saves a lot of money, because it is possible to dispense with the expensive exchange of watch glasses. This in turn supports the idea of resource saving and sustainability.
